

## CooperVision Launches Biofinity® XR Contact Lenses

### Date:

Sunday, October 20, 2013

**Pleasanton, CA, October 21, 2013**— CooperVision, Inc. today announced the launch of its Biofinity® XR contact lens brand. This is an extension to its popular [Biofinity](#) [1] (comfilcon A) silicone hydrogel technology, allowing practitioners to confidently fit a greater number of monthly replacement lens patients, including those with significant hyperopia and myopia.

Every day, countless people who suffer from severe near- and far-sightedness are faced with less than optimal choices to correct their vision. Thick glasses can create distortion and upend fashion sensibilities. Older contact lens materials limit “breathability,” with less oxygen reaching the eye. And the latest high performance lenses have only covered a limited range of prescriptions.

The Biofinity XR lens is the first of its kind that combines high oxygen permeability with all-day comfort characteristics required for wearers with more demanding prescriptions. With Biofinity XR, more people can enjoy the benefits of modern contact lens material and design, helping them live life without the hassle of glasses.

“The availability of Biofinity XR gives eye care practitioners another reason to make it a monthly lens of choice, whether transitioning Proclear® wearers, upgrading from a competitive lens, or introducing a broader span of spectacle wearers to soft lenses,” said [Dr. Juan Carlos Aragon](#) [2], senior vice president, Global Professional & Clinical Affairs, CooperVision. “The same outstanding vision, fit and comfort properties that the eye care community has come to expect from Biofinity are now available with Biofinity XR lenses.”

Biofinity XR is the only extended range monthly contact lens brand with [Aquaform® Technology](#) [3]. This technology makes the lens material highly breathable so more oxygen reaches the eyes, helping keep them clearer and whiter with less irritation. It also ensures that the lenses are naturally and uniformly wettable for smoothness and comfort, and maintains softness and flexibility for more gentle wear from the first day to the last.

Biofinity XR lenses are now available in powers from +8.50 to +15.00 (0.50 steps) and -12.50 to -20.00 (0.50 steps). The current Biofinity line continues to be available in +8.00 to -12.00 powers.

### About CooperVision

CooperVision, a unit of The Cooper Companies, Inc. [NYSE: COO], is one of the world’s leading manufacturers of soft contact lenses. Dedicated to continually bringing a fresh perspective to the contact lens experience for practitioners and patients, CooperVision specialises in lenses for astigmatism, presbyopia, and ocular dryness. The company routinely collaborates with eye-care professionals in the research and development of relevant products. CooperVision manufactures a full array of monthly and daily disposable contact lenses featuring advanced materials and optics. For more information, visit [www.coopervision.com](http://www.coopervision.com) [4].

Contact lenses are medical devices and can only be prescribed and dispensed by a licensed eye care professional.
