To Our Valued Eyecare Partners:

We have recently been asked if CooperVision, Inc. is manufacturing AquaSoft contact lenses for 1-800 CONTACTS. We have not been, nor are we currently involved in any private-label manufacturing collaboration for that lens. To the best of our knowledge, these lenses will be sold via a subscription-based model but are not yet available. According to their packaging, they are manufactured by Visco Technology out of Malaysia.

Our entire CooperVision team remains focused on providing the best possible products and services for contact lens fitters and wearers. Your extensive training, experience and knowledge is of the greatest value, providing an incomparable experience for consumers with you at the center of the equation.

Sincerely,

A handwritten signature in black ink, appearing to read 'Jerry Warner III'.

Jerry Warner III
