

CooperVision®

# Adopt-A-Patient®

## Program description

This program provides students an additional opportunity for a “hands on” fitting experience that would otherwise have been challenging due to a patient’s financial situation. CooperVision® will provide selected patients in need, a one-year supply of contact lenses upon completion of the fitting process at the school’s clinic or satellite clinics. **Adopt-A-Patient®** is intended to be a positive contact lens fitting experience for optometry students during their clinical contact lens internship while serving under-privileged patients.

## How the program works

Optometry students are encouraged to “adopt” a deserving patient from their community into the program, fit them with CooperVision soft contact lenses, and provide appropriate follow-up care during their clinical contact lens internship.

Each student is allocated one complimentary annual supply of soft contact lenses from CooperVision that they can provide to a deserving low income patient in their community. CooperVision imposes no patient eligibility requirements; the school is responsible for determining patient eligibility.

Exam fees, fitting fees and follow up care will be determined by each school. Many schools utilize a sliding scale for clinic fees, which may assist in determining program eligibility.

## Who is eligible?

CooperVision will leave recruitment criteria up to the discretion of the clinic director at each school. All CooperVision products are included in this program including MiSight® 1-day contact lenses – the first and only FDA approved\* soft contact lenses to slow the progression of myopia in children age 8–12 at the initiation of treatment.† Each school is allocated up to 12 MiSight® annual supplies per given calendar year.

The primary beneficiaries of the program are typically younger patients who would greatly benefit from contact lens wear, but would otherwise might not have the opportunity because of their family’s income level.

Program participants are generally third and fourth year optometry students.

---

## Program dates

The program is open year round and each student is allowed to select one patient during their third and fourth year of optometry school.

## Enrollment process

Lenses can be ordered by sending an e-mail to [emailcustomerservice@coopervision.com](mailto:emailcustomerservice@coopervision.com) with the subject line ‘AAP-[school name].’

## Payment / application / request process

VSP has partnered with CooperVision to provide financial assistance for the clinic fees for patients selected for this program.

The contact person at VSP for the **Adopt-A-Patient®** program is Vernon De La Cruz.

It is important to order all **Adopt-A-Patient®** lenses through [emailcustomerservice@coopervision.com](mailto:emailcustomerservice@coopervision.com) in order to avoid being invoiced for the lenses.

\*U.S. Indications for use: MiSight® (omafilcon A) soft (hydrophilic) contact lenses for daily wear are indicated for the correction of myopic ametropia and for slowing the progression of myopia in children with non-diseased eyes, who at the initiation of treatment are 8–12 years of age and have a refraction of -0.75 to -4.00 diopters (spherical equivalent) with ≤ 0.75 diopters of astigmatism. The lens is to be discarded after each removal. † Compared to a single vision 1 day lens over a 3 year period. 1. Chamberlain P, et al. A 3-year randomized clinical trial of MiSight® lenses for myopia control. *Optom Vis. Sci.* 2019; 96(8):556–67.
