Avaira Vitality

High performance. Outstanding value.

If you're nearsighted or farsighted and want the most for your money, choose CooperVision® Avaira Vitality™ contact lenses for long-lasting comfort at a surprisingly affordable price. They're made from an advanced silicone hydrogel material specially developed for comfort, easy handling* and a healthier lenswearing experience. And Avaira Vitality contact lenses have the same proven optical design features as our premium Biofinity® contact lenses to help provide you with crisp, clear vision. They're a smart choice for savvy contact lens wearers like you.

Ask your Eye Care Practitioner if a free trial of Avaira Vitality™ would be right for you.

Please note that free trial does not include eye exam or fitting fees.

The features you'll love

- The Aberration Neutralizing System[™] is designed to enhance vision quality by minimizing an optical imperfection[†] commonly found in eyes.1
- · Advanced material naturally attracts water molecules, keeping the entire surface of your lenses continuously moist throughout your day.
- High breathability allows your eyes to get 100% of the oxygen they need*, which helps keep them white2 and healthy§3
- · The highest class UV blocker available in a contact lens helps block transmission of 90% UVA and 99% UVB.
- * Based on subjective ratings at insertion and after 1 month. Results of a prospective, doublemasked, randomized, bilateral, crossover study comparing Avaira Vitality™ sphere contact lenses with a competitive reusable sphere lens
- + Spherical aberration.
- ‡ During daily wear.
- § With higher oxygen permeability than hydrogel materials, silicone hydrogel contact lenses minimize or eliminate hypoxia-related signs and symptoms during lens wear.

|| Warning: UV-absorbing contact lenses are not substitutes for protective UV-absorbing eyewear, such as UV-absorbing goggles or sunglasses, because they do not completely cover the eye and surrounding area. Patients should continue to use UV-absorbing eyewear as directed.
