

Biofinity Energys[®]

Contact lenses for your digital lifestyle.

CooperVision[®]
Live Brightly.[®]

If your busy days find you regularly shifting focus between digital devices and off-screen activities, try CooperVision[®] Biofinity Energys[®] contact lenses. They provide a remarkable balance of premium comfort, breathability and excellent visual performance. And they feature a breakthrough technology specially developed to keep up with today's digital lifestyles. Biofinity Energys lenses also feature Aquaform[®] Technology, which help your eyes feel less dry with digital device use and keeps your eyes comfortable all day long.

The features you'll love

- Digital Zone Optics lens design reduces stress on the eye muscles you use to focus on digital devices*, so you can shift focus between on-screen and off-screen with less effort.
- Aquaform Technology locks in water, helping your eyes feel less dry when blinking less often from viewing screens.
- High breathability gives your eyes 100% of the oxygen they need† to help them stay healthy, clear and white.¹

* Based on a statistically significant difference of the mean change of Accommodative Microfluctuations and when compared to Biofinity sphere after reading on an iPhone for 20 minutes.

† During daily wear.
