

# just like that, you're supporting a brighter future for our planet

You're big on sustainability—us, too.  
So we bet you'll appreciate this:

clariti® 1 day contact lenses are the **first net plastic neutral contact lenses**<sup>1</sup>.

For every clariti® 1 day contact lens sold in the US, CooperVision®—the makers of clariti® 1 day—has partnered with Plastic Bank® to **collect and convert an equal amount of ocean-bound plastic** through their global network.

Same great clariti® 1 day contact lenses - but now you're making a **positive immediate impact on the environment** simply by wearing them

Pretty cool when you can support sustainability **just by wearing a lens you will love**<sup>2</sup>.

**Loving what clariti® 1 day stands for? Let's talk about it at your next appointment.**

CooperVision®

plasticbank

1. CVI data on file 2020. Sustainability report, clariti® 1 day in U.S.. Based on top 4 global contact lens manufacturers.

2. CooperVision data on file 2020. Kubic masked online survey; n=224 US ODs who prescribe clariti 1 day toric. Top 3 boxes, strongly agree, agree, slightly agree.  
Warning: Do not expose contact lenses to water while wearing them.
